

AMENDMENTS TO THE CLAIMS

Claims 1-31 are pending in the instant application. Claims 1-31 have been amended. Claims 1, 11, and 21 are independent. Claims 2-10, 12-20, and 22-31 depend from independent claims 1, 11, and 21, respectively.

The Applicant requests reconsideration of the claims in view of the following amendments reflected in the listing of claims.

Listing of claims:

1. (Currently Amended) A method for customizing a channel interface, the method comprising:

determining ~~at least one of~~ one or both of personal media and/or broadcast media that is to be presented in a ~~communication~~ media channel;

determining a schedule for presenting said ~~at least one of~~ one or both of personal media and/or broadcast media in said ~~communication~~ media channel; and

presenting, at a first geographic location, said schedule comprising said ~~at least one of~~ one or both of personal media and/or broadcast media in a media guide, wherein said media channel may be pushed from said first geographic location to a second geographic location.

2. (Currently Amended) The method according to claim 1, further comprising presenting said media guide comprising representations of said at ~~least one of~~ one or both of personal media and or broadcast media in a graphical user interface.

3. (Currently Amended) The method according to claim 2 wherein said graphical user interface contains ~~at least one of~~ one or both of aural and or visual representations comprising ~~at least one of~~ one or more of audio, text, video and or graphics of said ~~at least one of~~ one or both of personal media and or broadcast media.

4. (Currently Amended) The method according to claim 2, further comprising controlling said graphical user interface by ~~at least one of~~ one or more of a keyboard, a mouse, a remote control and or a microphone.

5. (Currently Amended) The method according to claim 1, wherein said schedule correlates a particular one of said ~~at least one of~~ one or both of personal media and or broadcast media to ~~at least one of~~ one or more of a time, a day and or a year for said presenting of said ~~at least one of~~ one or both of personal media and or broadcast media in said ~~communication~~ media channel.

6. (Currently Amended) The method according to claim 1, further comprising selecting said ~~at least one of~~one or both of personal media and/or broadcast media from a list of sources.

7. (Currently Amended) The method according to claim 1, further comprising displaying access and control functions for controlling said ~~at least one of~~one or both of personal media and/or broadcast media from within said media guide.

8. (Currently Amended) The method according to claim 1, further comprising rescheduling when said ~~at least one of~~one or both of personal media and/or broadcast media is to be presented in said ~~communication~~media channel.

9. (Currently Amended) The method according to claim 8, further comprising updating ~~at least one of~~one or more of a time, a day and/or a year within said media guide, when said ~~at least one of~~one or both of personal media and/or broadcast media is to be presented in said ~~communication~~media channel.

10. (Currently Amended) The method according to claim 1, further comprising displaying a source of said ~~at least one of~~one or both of personal media and/or broadcast media within said media guide.

11. (Currently Amended) A machine-readable storage having stored thereon, a computer program having at least one code section for customizing a channel interface, the at least one code section being executable by a machine for causing the machine to perform steps comprising:

determining ~~at least one of~~one or both of personal media and/or broadcast media that is to be presented in a ~~communication~~media channel;

determining a schedule for presenting said ~~at least one of~~one or both of personal media and/or broadcast media in said ~~communication~~media channel; and

presenting, at a first geographic location, said schedule comprising said ~~at least one of~~one or both of personal media and/or broadcast media in a media guide, wherein said media channel may be pushed from said first geographic location to a second geographic location.

12. (Currently Amended) The machine-readable storage according to claim 11, ~~further~~ comprising code for presenting said media guide comprising representations of said ~~at least one of~~one or both of personal media and/or broadcast media in a graphical user interface.

13. (Currently Amended) The machine-readable storage according to claim 12, wherein said graphical user interface contains ~~at least one of~~one or both of

aural and/or visual representations comprising ~~at least one of~~ one or more of audio, text, video and/or graphics of said ~~at least one of~~ one or both of personal media and/or broadcast media.

14. (Currently Amended) The machine-readable storage according to claim 12, ~~further~~ comprising code for controlling said graphical user interface by ~~at least one of~~ one or more of a keyboard, a mouse, a remote control and/or a microphone.

15. (Currently Amended) The machine-readable storage according to claim 11, wherein said schedule correlates a particular one of said ~~at least one of~~ one or both of personal media and/or broadcast media to ~~at least one of~~ one or more of a time, a day and/or a year for said presenting of said ~~at least one of~~ one or both of personal media and/or broadcast media in said ~~communication~~ media channel.

16. (Currently Amended) The machine-readable storage according to claim 11, ~~further~~ comprising code for selecting said ~~at least one of~~ one or both of personal media and/or broadcast media from a list of sources.

17. (Currently Amended) The machine-readable storage according to claim 11, ~~further~~ comprising code that causes display of access and control functions for

controlling said ~~at least one of~~one or both of personal media and/or broadcast media from within said media guide.

18. (Currently Amended) The machine-readable storage according to claim 11, ~~further~~ comprising code for rescheduling when said ~~at least one of~~one or both of personal media and/or broadcast media is to be presented in said ~~communication~~media channel.

19. (Currently Amended) The machine-readable storage according to claim 18, ~~further~~ comprising code for updating ~~at least one of~~one or more of a time, a day and/or a year within said media guide, when said ~~at least one of~~one or more of personal media and/or broadcast media is to be presented in said ~~communication~~media channel.

20. (Currently Amended) The machine-readable storage according to claim 11, ~~further~~ comprising code that causes a source for said ~~at least one of~~one or both of personal media and/or broadcast media to be displayed within said media guide.

21. (Currently Amended) A system for customizing a channel interface, the system comprising:

at least one processor that receive[[ing]]es at least one indication of ~~at least one of~~ one or both of personal media and/or broadcast media that is to be presented in a ~~communication~~media channel;

said at least one processor receive[[ing]]s at least one indication of a schedule for presenting said ~~at least one of~~ one or both of personal media and/or broadcast media in said ~~communication~~media channel; and

said at least one processor caus[[ing]]es said schedule comprising said at ~~least one of~~ one or both of personal media and/or broadcast media to be presented, at a first geographic location, in a media guide, wherein said media channel may be pushed from said first geographic location to a second geographic location.

22. (Currently Amended) The system according to claim 21, wherein said at least one processor presents said media guide comprising representations of said ~~at least one of~~ one or both of personal media and/or broadcast media in a graphical user interface.

23. (Currently Amended) The system according to claim 22, wherein said graphical user interface contains ~~at least one of~~ one or both of aural and/or visual representations comprising ~~at least one of~~ one or more of audio, text, video and/or

graphics of said ~~at least one of~~ one or both of personal media and or broadcast media.

24. (Currently Amended) The system according to claim 22, wherein said at least one processor controls said graphical user interface by ~~at least one of~~ one or more of a keyboard, a mouse, a remote control and or a microphone.

25. (Currently Amended) The system according to claim 21, wherein said schedule correlates a particular one of said ~~at least one of~~ one or both of personal media and or broadcast media to ~~at least one of~~ one or more of a time, a day and or a year for said presenting of said ~~at least one of~~ one or both of personal media and or broadcast media in said ~~communication~~ media channel.

26. (Currently Amended) The system according to claim 21, wherein said at least one processor selects said ~~at least one of~~ one or both of personal media and or broadcast media from a list of sources.

27. (Currently Amended) The system according to claim 21, wherein said at least one processor displays access and control functions for controlling said ~~at least one of~~ one or both of personal media and or broadcast media from within said media guide.

28. (Currently Amended) The system according to claim 21, wherein said at least one processor reschedules when said ~~at least one of~~ one or both of personal media and/or broadcast media is to be presented in said ~~communication~~ media channel.

29. (Currently Amended) The system according to claim 28, wherein said at least one processor updates ~~at least one of~~ one or more of a time, a day and/or a year within said media guide, when said ~~at least one of~~ one or both of personal media and/or broadcast media is to be presented in said ~~communication~~ media channel.

30. (Currently Amended) The system according to claim 21, wherein said at least one processor causes a source of said ~~at least one of~~ one or both of personal media and/or broadcast media to be displayed within said media guide.

31. (Currently Amended) The system according to claim 21, wherein said at least one processor is ~~at least one of~~ one or more of a media processing system processor, a media management system processor, a computer processor, a media exchange software processor and/or a media peripheral processor.
